

SNAME OF BORDERLINE PRODUCT

CANNABO

hand cream

COMPOSITION

50 ml CANNABO hand cream contains natural cannabis extract which provides 50 mg CBD (Cannabidiol extracted from hemp plant).

WHAT IS CANNABO hand cream AND WHAT IT IS USED FOR

CANNABO hand cream contains cannabidiol (CBD), i.e. oil extract from hemp plant obtained by supercritical CO₂ extraction, with proven absence of herbicides and pesticides.

CANNABO hand cream does not contain THC (9-delta tetrahydrocannabinol) i.e. contains a quantity lower than 0.2%.

CBD binds to the appropriate receptors on the skin's endocannabinoid system on the cells of the surface layer of the skin (epidermis), achieving an anti-inflammatory and soothing effect. The skin of the hands is directly exposed to the harmful effects of the external environment, leading to dry and cracked skin, with redness and burning sensation. With its antioxidant properties, CBD neutralizes free radicals, increases skin resistance, reduces loss of moisture and premature skin aging on hands. With its anti-inflammatory action, CBD soothes redness and reduces the burning sensation of the skin on hands and accelerates regeneration.

CANNABO hand cream is intended for extremely dry, irritated and cracked skin and provides a quick and long lasting protective effect as well as a nourishing feeling immediately after application. The specially selected ingredients of the cream with innovative technology combining CBD, marigold extract, vitamin E and panthenol, soothe irritations. Marigold flower extract promotes healing and regeneration of the skin, reduces inflammation and prevents tissue damage. Vitamin E protects the epidermal lipids as well as the collagen and elastic fibres of the skin from harmful effects from the environment and smoothers and softens the skin. Panthenol has a moisturizing and soothing effect, reduces redness and has an anti-inflammatory activity.

This combination gives a feeling of intense hydration and freshness, which persists long after the application of the cream and the skin of the hands becomes soft, smooth and lighter.

INFORMATION FOR PROPER USE

Apply a small amount of the cream on the hands and nails with a massage. Use the cream according to your needs.

The lightweight formulation of the cream allows it to absorb quickly without leaving any greasy stains or an unpleasant sticky feeling.

Eye contact should be avoided when using this product.

CANNABO hand cream is intended for external use only.

NECESSARY INFORMATION BEFORE USE

CANNABO hand cream should not be used if hypersensitivity to any cream ingredient exist.
